## WORK EXPERIENCE

### PROGRAMMER, MOSCOW STATE UNIVERSITY OF INFORMATION TECHNOLOGIES, RADIO ENGINEERING AND ELECTRONICS

1 Nov 2015 – present

I have developed geo-information system for Ministry of Education and Science of Russia for less than 4 weeks. It was a hard-working time and I have had a lot of experience to work in a team. I have implemented bootstrap 3 into the system and developed some snippets for the team.

The last project has been developed in MVC-pattern using Backbone+Marionette. This SPA helps to collect and organize data all over the country from different universities and science-oriented organizations.

My responsibilities as a developer include the following:

- Modelling application architecture;
- Design and UI/UX of the entire system;
- Developing JavaScript platform based on object-oriented methods;
- Training teammates progressive web technologies and implementation to team's projects;
- Creating useful js-components for the team.

### MOBILE WEB-DEVELOPER, ESKI.MOBI

Jan 2013 – 7 Sep 2015

I worked as mobile front-end developer at Eski.Mobi, a company creating mobile-version of already existing websites. I have developed about 100 mobile versions of websites.

It were sites of banks, social networks, e-commerce, medical and dental clinics, TV channels, religious organizations, etc.

My responsibilities as a Mobile Front-end developer include the following:

- Creating adaptive, responsible layouts, which perfectly worked on iOs, Android, Windows Phone, and any tablets.
- Designing wireframes and mockups.
- Preparing bug reports.
- Reviewing bugs and solving problems which linked with different features of mobile OS and layout engines of browsers.

- Creating the main template that was used to build sites by other developers of our team.
- Heading multiple (up to 6) sites simultaneously;
- Being responsible for the quality of all mobile sites produced.

Besides, I used the following technologies: CSS3, Less, HTML5, jQuery, pure JavaScript

### CTO, MEBEL-SUN

Mar 2014 – Jan 2015

An e-commerce start-up with a friend;

I have developed e-commerce store based on OpenCart CMS, set up advertising campaigns;

My part of the work was media planning, researching the customers behavior, developing the store and creating the design;

### JUNIOR LABORATORY TECHNICIAN, MOSCOW STATE UNIVERSITY OF INFORMATION TECHNOLOGIES, RADIO ENGINEERING AND ELECTRONICS

Jan 2014 – Jul 2014

While working as an laboratory technician in my university, I accomplished the following goals:

- Developed two one-page is application for simulating radar landing system of military aircraft for the Russian Air Force
- Published a textbook for students, which includes about 200 tasks and 5 theoretical sections;
- Served several CISCO and Huawei racks;
- Developed a mobile version of the site of my university and some different promo-sites.
- Taught a course of LESS (css preprocessor) for a year at the University.

### JUNIOR WEB-DEVELOPER, TWOFINGERS

Jan 2012 – Mar 2012

First experience of working in a team of developers.My job at the company included:

- Developing 5 web-sites in 2 months;
- Creating a user guide for the products;
- Designing advertising articles and newsletters;
- Preparing text and graphic material for the developing website;
- Creating bug-reports;
- Using the following technologies: CSS2, jQuery, HTML4

### WEB-DEVELOPER, FREELANCE

Sep 2009 – Jan 2013

In this period, I gain knowledge, experience in development and project management.

Within one year, I was a project manager and developer of a social-news network in a small startup. I have created a lot of different sites based on Wordpress, Social Engine 3.0, and some design mockups for web and for polygraph.

I used PHP, Smarty, CSS, HTML, JavaScript and some graphic editors.
